

A.12 OCEAN VECTOR WINDS SCIENCE TEAM

NOTICE: Ocean Vector Winds Science Team (OVWST) will not be competed in ROSES this year. The OVWST is tentatively scheduled to next solicit proposals in ROSES-2017.

The Ocean Vector Wind Science Team (OVWST) supports the analysis and interpretation of ocean vector winds and other applications derived from Earth-observing missions carrying scatterometers and polarimetric radiometers. Every four years, this program element solicits scientific investigations that require the accurate and extensive vector wind and backscatter measurements. This element was last competed in 2013 and is anticipated to be open again in ROSES-2017.

Extensive background on NASA's ocean vector wind science program and missions is available at <http://winds.jpl.nasa.gov/>.
